Java

```java
package q10842;
public class ImplicitConversion {
    public static void main(String[] args) {
        int i = 20, intsum;
        char ch = 'a';
        float floatsum;

        intsum = i + ch;
        floatsum = i + ch;

        System.out.println("Integer result = " + intsum +
                           " Float result = " + floatsum);
    }
}

```
